

Hello and Welcome to Musical Mentorship!

I am so happy you're here and I hope I can help you get where you'd like to go in your study of music. Many of my ideas and practices might be a bit unconventional, however my sole purpose is to help you as an individual grow your musicality and knowledge of the piano. We will often learn together as we go. I'd like to tell you about myself before we get started so you have an idea of what you're getting yourself into!

I grew up in a musical home and began playing the violin when I was 3 years old. I started teaching myself to play the piano around age 5 and began lessons around age 8. Since then I've never stopped playing! I may have hated lessons and even quit from time to time, but my love of the piano has stood the test of time.

Some of my piano experiences include concert performances, competitions, jazz bands, choral and solo voice accompaniment, song arrangement, and composition.

Though I may not be an expert in all of these areas, I am committed to helping you, a musical individual, find what is fulfilling to you. An understanding of piano and music theory leads to an ability to express yourself and bring joy to those around you. I promise to guide you through this part of your musical journey with passion and do my best to push you in the direction you'd like to go!

Thank you,

Aubrey Markham
